

# ENSURING ORGANISATIONAL COMPLIANCE

whilst achieving organisational objectives,  
and creating stakeholder value in an  
ethical and sustainable manner,  
through the use of CURA COMPLIANCE.

*Non-compliance can lead to costly fines,  
personal liability or even imprisonment.*

*In today's complex and ever increasing regulatory environment,  
can you be assured that your organisation  
is legally compliant?*

Managing compliance requires adherence to a multitude of legal and regulatory requirements such as GDPR, MFA, PFMA, FICA, FAIS, to name a few.

CURA's Compliance Solution assists with the tracking, measuring and implementation of your compliance program across all areas or departments within your organisation.

## FEATURES

- ✓ Ability to house multiple regulations
- ✓ Integrated into content libraries which provide live updates such as LexisNexis
- ✓ Compliance Monitoring
- ✓ Tasks, actions, notifications and escalations
- ✓ Policy management
- ✓ Electronic sign-off
- ✓ Multiple regulations can be addressed by a single control preventing duplication of effort
- ✓ Fully integrates with IRM or other GRC functionality

CURA's easy to use Compliance solution can help you achieve your organisational compliance programs with fewer resources and at a greatly reduced cost.

***With policy management, compliance monitoring and self service dashboards you can quickly and easily determine your organisation's level of compliance.***

## BENEFITS

### Manage your Entire Compliance Program Within One Easy to Use Solution:

CURA provides you with easy access to all your compliance information and the ability to configure the entire system to meet your specific needs.

### Compliance Libraries:

CURA can house multiple regulatory requirements from multiple regulators in a simple and easy to use library.

### Deploy Easily and Quickly:

CURA can be deployed in an on premise or hosted environment, with pre-packaged solution templates for common Regulatory Requirement such as GDPR, MFA, PFMA, FICA, FAIS to name just a few.

### Obtain Clarity Through Convergence:

CURA enables managers to improve insight and oversight of the regulatory risks and exposures of the business at all levels of the organisation. Actions, trends and treatment strategies across multiple business disciplines and areas are identified, assessed, treated and monitored.

### Work in Virtual Autonomy:

Each department can make use of CURA Compliance and track its compliance program using both standardised and unique approaches. This allows compliance officers to retain responsibility and independence in their business areas, whilst ensuring overall organisational compliance with fewer resources.

### Protecting your Future:

CURA Compliance serves as the foundation for your organisation to grow towards full GRC maturity. The CURA platform offers enterprise risk management, surveys for RCSA or compliance monitoring, audit management, loss events, qualitative and quantitative risk modeling, scenario analysis as well as other GRC solutions.
